The Sum and Substance

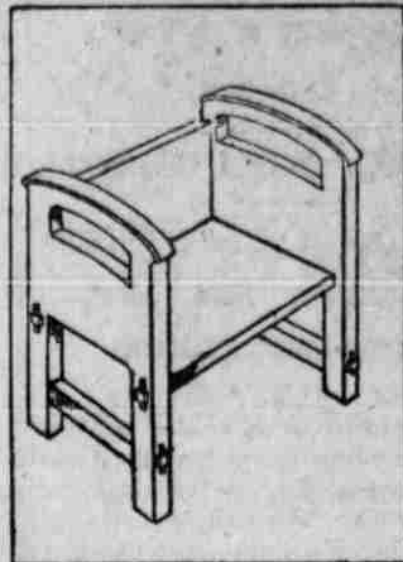

of being a subscriber to this paper is that you and your family become attached to it. The paper becomes a member of the family and its coming each week will be as welcome as the arrival of anyone that's dear. It will keep you informed on the doings of the community and the bargains of the merchants regularly advertised will enable you to save many times the cost of the subscription.

IS THIS THE OLDEST BOOK? REALLY TWO CHAIRS IN ONE

Egyptian Papyrus Manuscript That Antedates the Time of Moses by Many Centuries.

A priceless manuscript of 18 pages, found in an Egyptian monument and published in facsimile in France about the year 1847, is thought to be the oldest book in the world. Procured at Thebes by Prisse d'Avennes and presented by him to the national library at Paris, it is usually called the "Papyrus Prisse," from the name of the donor. As the manuscript was found in a monument of the eleventh dynasty, it must be anterior to the shepherd kings and therefore older by many centuries than the time of Moses—older even than the date usually assigned to Abraham—and so of all existing books it would be the most ancient. The words of every page, though believed to have been written 4,000 years ago, are intensely black to this day and in a bold, round hand. By a curious irony this echo from the very childhood of the world laments the good old times that had passed away. The author, who was a prince of the royal blood, gives warning to the young and declares that the words of ancient wisdom should be the daily food of children and grown men alike. Humility and obedience he makes to be the foundation of all virtue.—Christian Science Monitor.

From the number and variety of collapsible convertible and combination chairs of all sorts that are on the market, the designers would seem to have reached the end of their rope. Here comes a Californian, however, with an invertible chair which seems to be the simplest one of the lot. This is a combination rocker and standard chair, and all that is needed to transform it from one to the other is to turn it upside down, or right side up, whichever way you like to regard it. The chair is shaped like a piece of

mission furniture, and the rockers, which are short, serve as curved arms when it is stationary. They are protected when down by a metallic sheath, which also figures as an ornament when they are up. The back is so made that it slides up and down in a groove and can be adjusted in whichever position is required. Withal, the chair is a sturdy and attractive piece of furniture, and is likely to be popular on its merits.

FEARFULLY LAZY

First Lawyer—Is your office boy lazy?
Second Lawyer—Lazy! Why he's killed so much time that he is ashamed to look a clock in the face.

DICKENS' INVITATION.

Come to England! Come to England! Our oysters are small, I know; they are said by Americans to be coppery; but our hearts are of the largest size. We are thought to excel in shrimps, to be far from despicable in point of lobsters and in periwinkles are considered to challenge the universe. Our oysters, small though they be, are not devoid of the refreshing influence which that species of fish is supposed to exercise in these latitudes. Try them and compare.—From a Letter.

PREACHERS' SMALL SALARIES.

A comparison of the wages paid in various trades and occupations, with the salary of the average preacher, prepared for the New York Methodist Episcopal conference, shows that the preacher receives about half as much as the average skilled laborer.

"Outside of a hundred of the largest cities," the report says, "the average salary of the Methodist minister is \$573 a year."

ALWAYS.

Time haunted her. She laughed at him, she resorted to a thousand devices whereby to discomfort him, but he was not to be shaken off. At length she lost her temper.

"Can't you see," she flared out reluctantly, "that there's no room for you where beauty dwells?"

"There is always," Time rejoined, touching his scythe significantly, "room for one mower!"—Puck.

FULLY DOMESTICATED.

A small boy had gone with his mother to board for a fortnight at a farm house down in Maine. At the first meal they found innumerable flies buzzing about the table. The small boy regarded them closely for a minute or two, and then pined out, much to the discomfort of the landlady and the amusement of the boarders.

Use of Baking Ammonia.

Baking ammonia (powdered rock ammonia) is used to some extent in pastry making, lemon bismuits (so feathery light and delicate), are commonly made with it, but we would hesitate to recommend its use ordinarily for making bread. Like other salts and chemicals, the strength of the powder may vary considerably with the time and condition of keeping, and your best plan would seem to be to inquire of the druggist the specific amount to be used. It should be sifted free from lumps and is then sifted among the flour and used thus with the other ingredients in pastry making. It raises biscuits beautifully light and possibly similarly good results could be obtained with bread.

Sweet Potato Buns.

Boil and mash two potatoes, rub in as much flour as will make it like bread, add a little nutmeg and sugar to your taste with a tablespoonful of good yeast. When it has risen work in two tablespoonfuls of butter cut finely; then form it into small rolls and bake on tins a nice brown. Serve hot; split open and butter. Good either for tea or breakfast.

Paranip Cones.

Boil three good-sized paranips and mash them very fine. Add to this a half cup of grated pineapple, butter, pepper, salt, a dash of nutmeg, a teaspoon of sugar, one egg, a teaspoon of good sherry and a tablespoon of cream. Add enough cracker dust to form them into little cones, and fry in very hot lard. Serve in napkin gilded with watercolor.

The Nashville Tennessean

and THE NASHVILLE AMERICAN

SUNDAY EXCEPTED!
